About Us

United Enterprises & Co. Ltd. was formed in 1978 by the Founding Directors who envisioned a firm with a core set of values including innovative thinking, commitments to its stakeholders, and being ethical in all its practices. Today, after four decades of pioneering business, it is now well known as United Group: one of the most recognized business houses of Bangladesh.

The core values have been tremendously beneficial for the Group over the years. We believe our unique understanding of economic & industrial priorities and our dedication towards excellent client service have helped us to branch out in a number of commercial ventures. Power Generation, Healthcare, Real Estate & Construction, Manufacturing, Yarn Spinning, Higher Education, Land Port, Tank Terminal, Shipping and Specialized Services are but a few of the areas we are directly involved in. As a result, the Group has a present valuation of approximately TK. 200,000 million (US\$ 2.548 Billion), a very honorable achievement in the space of four decades.

However, we have no plans to slow our growth pace. Bangladesh has now ventured into a new millennium with many more business opportunities than there were in the past. Now that we have solidified our foundations, we hope to add many more bricks to what could one day be a world-renowned business empire.

We are committed to socio-economic development of the country
– Hasan Mahmood Raja, Chairman

Message from the Chairman

Beginning our journey in 1978, we set up a course to establish a name that will eventually become one of the most trusted business houses in the country. Looking back at the 40 wonderful years that we have travelled in this path, the journey has not been easy, but immensely fruitful, nevertheless. Over the years we have set a course to be the best brand committed to excellence in all our endeavors. Our elemental strength is our ability to adopt the present day challenges while we also attend to our individual responsibilities to the society and our nation at large.

United was conceived as a business entity committed to socio economic development of the country as we continuously enhance value for our stakeholders. United's obligation is not limited only to its investors; United has never failed to uphold its responsibilities to all those who are impacted by its operation as an economic entity.

We have a duty towards our country, the Government being one of our key stakeholders. United has earned recognition of being the highest value added tax payer in the country, through one of its concerns. All relevant taxes and duties are paid in time and all our businesses are conducted in adherence to the rules and regulations applicable for the businesses.

We are selective when it comes to implementing projects, our major selection criteria being the scope for value addition to the society and the economy. We have introduced a number of pioneering solutions to various sectors of the country, namely infrastructural projects such as power plants. We believe in working hand in hand with the government and congratulate the government's initiative on Public-Private Partnership projects.

We are also hopeful about our ongoing Real estate projects such as United City a township project located in Satarkul Dhaka and IPCO Developments (Bangladesh) Ltd. We are setting up a High-Tech IT Park approved by BEPZA within United City.

We have braved uncharted territories, without hesitating to shoulder the "all-risk" package. From establishing the first Independent Power Plant in Khulna to the first, and till date the only, private Land Port between Myanmar and Bangladesh at Teknaf, United has been a tale of many firsts over the past 4 decades.

United attracts meritorious employees as we offer a platform to perform to the best of abilities. Our diverse business portfolio, spanning from healthcare to education, power generation to port, terminal, shipping, from manufacturing to real-estate, ensures a synergy giving a wider exposure to multi-various industries to our employees.

Human capital are our most important assets and investing in them for their development remains to be one of our core business strengths. For the betterment of the employees we are providing Medical & Insurance Facilities, interest free loan and also building Executive Official Complex within United City. In future we have plan to provide transport facilities to the employees.

Bangladesh has been a nation truly blessed by mother nature. The natural resources and the terrains embedded in the folds of this small country is a gift. As business house operating on this very land, we have an obligation to take care of the environment around us. We have adopted environment friendly practices. Our power plants have ISO certification, we use multi-stage processes in our power plants to reduce the burden on precious fossil fuels, our industries have closed loop ventilation systems. Our project design teams prioritize efficiency in both construction and operations stages as it is only through efficiency can we ensure less consumption from the nature and reduced emissions to the nature.

Last but not the least remains the duty to our community. Through United Trust we intend to inject our blessings back to the society. United Trust is the social welfare organ of United and has been focusing on critical issues such as rural education, health and sanitation, poverty alleviation and community service. United shall keep patronizing United Trust as much as they required in their endeavor to contribute to the community.

We believe in growing together. United has evolved together with the nation and if the Almighty wishes, shall continue to match pace and support the growth of the nation as Bangladesh moves onto its next growth chapter.

We are United to build the nation and take care of the community around us.

Hasan Mahmood Raja
Chairman
United Enterprises & Co. Ltd.

*To be the best brand committed to excellence in all our endeavors
– Moinuddin Hasan Rashid, Managing Director*

Message from the Managing Director

United Group, a multi-disciplinary business house, has proven itself to be a dynamic and progressive enterprise, positioning itself as one of the leading business houses of the country. We are now working to achieve being the best brand committed to excellence in all our endeavors – our long-term management vision. This calls for us to create a robust platform capable of delivering consistent growth under any condition.

By the Grace of Almighty, we are certainly privileged to have received the strongest of platforms as gifts from our founding directors. They have presented us with a healthy financial base, strong asset backing, a company without debt and liabilities, a timely and forward-thinking succession planning and lastly, an undeniable reputation in the market.

We have been concentrating on implementing succession planning and restructuring the business units for the last 4-5 years. Alongside asset and capital, development of human resource are crucial to achieve the vision that we have set for the company. In fact, we believe that our effective human resource is the next big ingredient to drive us to tomorrow. The Group presently employs around 7,800 individuals where female representation stands at around 20% and more than 50% of our employees are professionals. Our structure is such that the top line executives are experienced professionals fostering youth leadership as the middle and bottom lines are the young leaders of tomorrow. The average age of our employee stands at around 35 years where most of these young professionals have been working with us for around 7-8 years already! We have set a target of creating 15,000 value added employment out of which we hope to achieve the 10,000 employment by the end of 2019, owing to the number of ongoing construction projects that are scheduled to come into operation by that time. In 2018 alone, we have invested about Taka 30 lacs for human resource development in the form of training both home and abroad. The management of United is working hard to give the best working environment and a healthy culture that encourages bonding and interaction among the employees, increasing their comfort level.

United has built a strong repute of thinking out of the box as we continue to present the nation with innovative solutions to cater to the socio-infrastructure needs of the country. From the first private sector power plant in the country to the first private land port, we have presented the nation with many of its first of a kind projects.

Establishing a 200 MW HFO fired power plant with complete fuel storage and handling facilities in a mere 6 months has been so far one of the boldest of our projects. The project earned the recognition of being the Best Power Producer in 2018 at the National Energy & Power Week. At present, United's power plant is supplying 900 MW to the national grid.

We are blessed with a series of upcoming projects- Power Projects of 615 MW, IPCO, Shipping, Tank Terminal, United City in Satarkul, Unimart expansion and many more in the pipeline. With 615 MW of power generation facilities under construction, 600 MW more in the pipeline and a subsidiary having the largest market cap in fuel & power sector, we are well posed to retain commendable presence in the power sector. Most of our power assets are now debt-free and UPGDCL, the 1st commercial independent power plant of the Bangladesh has been listed. These steps will catapult United to the next level – to undertake bigger projects and create value for people of Bangladesh.

We have developed and structured an engineering, procurement and construction team which has the largest EPC Experience in Bangladesh. Our O&M team, United Engineering & Power Services Ltd. is committed to providing successful operation and maintenance services to all our power plants.

We set up the first true to sense tertiary level hospital with cardiac surgery facilities, radioactive oncology, nuclear medicine and cardiology equipment all under one roof in 2006. United Hospital, equipped with 500 beds and 11 state-of-the-art operation theatres, are staffed by the most esteemed doctors in their respective fields.

United International University is the 1st private university in Bangladesh which has disbursed USD 120,000 as research grant among its faculties for 31 different research project. Enrolling over 7000 students, UIU has recently made the move to its own campus at United City Satarkul sprawling across an area of 8 acres.

United Securities Ltd., our venture into the capital market of Bangladesh to serve local & foreign investors, has made its place among the top 5 companies in terms of turnover within 6 months of its operation. We are committed to help strengthen the capital market, having already invested USD 142 million, with plans to invest more in the future.

United is focusing on improving the living standard in Bangladesh, particularly in Dhaka city, through investment in retail and real estate. Unimart Ltd., the largest hypermarket of the country, has set the precedence of the ultimate retail experience to its clients while Chef's Table is the new food district in town introducing an incredible, versatile culinary experience and the most diversified cuisines under one roof for the first time in Bangladesh.

We have not limited our drive to improving standard of living through commercial ventures only. We want our employees to experience the same standards of living that we are endeavoring to develop. In this view, in addition to developing and constructing residential and commercial spaces, we are also developing an Executive Complex at United's township project at United City to house our employees.

Our goal is to continue the path towards sustainable growth as we set our focus on Infrastructure, Real Estate and CSR. We will remain one of the foremost investors and developers in Bangladesh in the Infrastructure sector as the process of diversification continues, parallelly. We have set forth an investment target of USD 200 million over the next 3 years. We believe in greater good of mankind and as such have not forgotten the community around us. United Trust was formed in 2010 as the social welfare organ of the Group with a vision to serve socially disadvantaged population of our country. We believe United exists to serve United Trust and it is in this view United will be injecting the majority of its turnover to United Trust after meeting the above investment target.

We at United have a mission to remain committed to the socio-economic development of the country as we continue to enhance value for our stakeholders. We seek to deliver a better tomorrow as a socially responsible corporate entity through supporting community development activities; embodying the values of entrepreneurial leadership and integrity.

We are a business house of Trust.

Moinuddin Hasan Rashid
Managing Director
United Enterprises & Co. Ltd.

Power

United Group has been at the forefront of introducing numerous pioneering solutions in power sector of Bangladesh. Its journey in the power sector began in 1997 with country's first Independent Power Producer (IPP), the barge mounted Khulna Power Company Ltd. The Group also introduced the concepts of Commercial Independent Power Plant and Combined Cycle Modular Power Plant in Bangladesh. The achievement of developing the nation's first power plant in joint venture with the Government of Bangladesh also belongs to United Group.

The track record of continued excellence over the last two decades have led to the Group being the recipient of appreciation from global and local stakeholders in the form of awards, certifications, etc. The recognition United has received over the years is a testament to its contribution in Power Sector of Bangladesh through pioneering solutions, value addition and operational excellence. In 2015, the Group, for one of its projects, was honored at the Asian Power Awards in three categories, winning Gold, Silver & Bronze awards respectively. The Government of Bangladesh have continuously acknowledged the efforts and contribution of United Group, through multiple awards such as "Best Large IPP of 2016 (Gas)" and "Best Power Producer of 2018 (Private Sector)".

Till 2018, the power generation portfolio of United Group exceeded 2,100 MW. Its 9 operational power plants are contributing more than 900 MW to the national grid. In parallel, United is the largest local Engineering, Procurement & Construction (EPC) contractor and Operations & Maintenance (O&M) contractor for power generation units with more than 800 professionals working around the clock for constructing, operating and maintaining the assets.

With in-house EPC and O&M assets in addition to the goodwill as a developer who "gets the job done", United Group's journey in the Power Sector is only about to take off.

Power Division

Generation & Shareholding

Real Estate & Construction

United Group started its journey in the real estate & construction sector in 1991, as Dream Builders Ltd., giving its clients a home and a place of work that suits their tastes. With residential projects located at the most luxurious, prominent regions of Dhaka, United Group aims to provide heartwarming feeling with ideal living environments in concert with safety, healthy and fulfilling lifestyles.

On the other hand, premium commercial and industrial projects developed by United offer to be the perfect workspace for the best business with modern design, advanced preparedness against disasters and state-of-the-art facilities, having the experience of building projects such as airport runways, river training, land banks & shopping centers. The Group strictly maintains environment friendly practices and activities for each of its developments. Having significant experience in structuring complex projects, now it has focused on shaping one of its dream developments called United City, a township project.

Healthcare

United Group established United Hospital Ltd. (UHL), a global standard multi-specialty multidisciplinary tertiary level care healthcare facility in 2006. Its primary motto is to contribute to the country's growing demand for quality healthcare support specially given that healthcare services in Bangladesh may still be considered inadequate for a burgeoning population of 160 million. UHL was the first world class hospital in the nation with Bangladeshi ownership and continues to provide class leading range of the latest diagnostic, medical and surgical facilities including a comprehensive cancer care centre. UHL plans to extend its footprint and services to other parts of Dhaka including other major cities of the country.

United Group has always strived for contributing to the country's betterment. As human capital and quality of service plays a vital role in the healthcare sector, the Group has also established one of the top nursing colleges in the nation focusing on improving quality services by trained nurses.

380,000 + Registered patients

Port, Terminal & Shipping

United Group has earned the fame of being only port operator in the world with absolutely zero handling loss throughout its operational years. It stepped into the liquid cargo handling business in early 90s through acquiring a tank terminal from foreign owners, becoming the private sector firm of Bangladesh to operate such terminals. Based off the success of the first investment, the second such terminal was acquired the latter half of 90s. Having the experience of successfully operating two tank terminals led United Group to establish a land port in 2004, two more tank terminals for liquid fuel storage & handling and initiate fuel logistics business in recent years.

Port & Terminal

Soya Products Bangladesh Ltd.
 100,000 MT liquid fuel storage tank terminal
 47.5 acres of land area
 API 650 & NFPA 30 standards

United Bulk Refinery & Storage Ltd.
 10,000 MT Fuel Oil Storage Tank Terminal

United Land Port Teknaf Ltd.
 Only border trade port between Bangladesh & Myanmar
 27 acres of land area
 27 years BOT contract
 2,665,351 MT Cargo Handled

United Shipping & Logistics Services Ltd.

United Shipping & Logistics Services Ltd. is the entity under the banner of United Group with the mandate of operating the fuel oil logistics business. It remains focused on shipping and distributing fuel oil to customers as its core business and is well-positioned in the Bangladesh market as an entity of choice for the ever-increasing demand for liquid fuel handling & logistics services. In operation since 2014, it offers a remarkable range of logistics solutions to internal and external customers, mainly power plants, for on time and efficient import and distribution of liquid fuel. In addition, USLSL is also involved in lighterage operations based on the need of its clients.

2 Vessels
 4800 MT total carrying capacity
 100+ fuel transport assignments completed successfully

Education

Bangladesh has seen a revolution of growth, expansion and reach of higher education the recent decade. Until the early 90s, university education in Bangladesh was provided by the state. Often the demand for university education outstripped supply. Hundreds of students were found to be leaving the country for higher studies, not necessarily enrolling in good institutions. This was resulting in a substantial drainage of foreign reserve, not to mention the nation's loss in potential human resources that is required for growing economies like Bangladesh.

A nation's wealth lies in its youth, provided the youth can be turned into human resources with proper education. Realizing the crying need of the nation to retain its youth and help shape them into skilled human resource, United stepped in to the education sector of Bangladesh as a private sector promotor of tertiary level education in Bangladesh in 2005. Over the past decade, United has not only established educational institutions but has set up the necessary infrastructural and logistic support and campus environment that is conducive to teaching and learning endeavors.

United International University

Manufacturing

Taking note of Bangladesh's ambitious growth targets, it is very important to give serious attention to manufacturing for both employment expansion, productivity enhancement and increasing per capita income targeted to reduce poverty in the country. In its early years, the manufacturing sector of Bangladesh was constrained due to inadequate private investment, however, the need for industrialization was well recognized and private sector investment was much welcomed. The manufacturing and textile started picking up pace. As per recent statistics, textiles, RMG and manufacturing sectors are the major contributors to the national GDP. United's journey in this sector began in the mid-90s with the establishment of a spinning mill. The later years saw the establishment of sewing thread industry, PET bottle manufacturing industry and last but not the least, a lubricating oil blending plant.

Comilla Spinning Mills Ltd.

Comilla Spinning Mills Ltd. with its **50,000 functioning spindles** producing **14 tons of yarn a day** was established in 1996 over **13 acres of land** in Burichong, Comilla

Gunze United Ltd. is a joint venture with the 118 years old Japanese icon, Gunze producing finest quality silk thread since March 2012. This **ISO Certified** factory uses steam from United's UPGDCL DEZ Power Plant for manufacturing its products, making the factory environment friendly

Gunze United Ltd.

United Lube Oil Ltd.

United Lube Oil Ltd. is the sole distributor, exclusive marketing agent and manufacturing counterpart of **Petronas Lubricants International (PLI)** supplying premium quality lubricant products, having covered all **64 districts** and established a **30,000 MT annual production capacity** blending plant at Mongla

United Polymer Ltd. is a value based manufacturing unit focused on innovating, manufacturing and marketing of **polyethylene (PET) products** as well as comprehensive liquefied material handling systems for the consumer and industrial bottles.

United Polymer Ltd.

Retail & Services

Bangladesh's ever-growing economic advancement will not be complete without the development in its service industry. Bangladesh's service sector has registered a steady growth in the recent years and is projected to continue its growth. The performance of the service sector has significant impact in a country's economy. In the process of global economic integration, competitiveness plays a vital role in the success of international trade; competition in the services sector therefore can influence competitiveness of our economy. The services sector is difficult to define and to encompass. United's unique understanding of the country as a whole and its people have allowed to identify the key areas where telling contribution may be made in the services sector. Be it providing end to end construction solutions to travel assistance to capital market, retail and power plant operation and maintenance, United has successfully created a unique example of dedication in client service in the service industry of Bangladesh.

Unimart Ltd.

Unimart Ltd. is the **largest hypermarket** of the country covering **40,000** sft floor space in Gulshan 2, giving the ultimate retail experience to its clients

Serving **55,000** customers per month

Maintaining **500+** suppliers

Highest **Average Basket Value (ABV)** in the market

Chef's Table introduces an incredible, versatile culinary experience and the most diversified cuisines under one roof for the first time in town, encompassing an area of **27,000 sft** with over **600 seating** arrangement and **20 brands** offering global cuisines

Chef's Table

United Makkah Madina Travel Assistance Co. Ltd.

United Makkah Madina Travel Assistance Co. Ltd. is one of the leading and registered travel agencies authorized to deal with all Hajj and Umrah matters, having **arranged Hajj for over 3,500 muslims** and **Umrah for 12,178 muslims**

United Securities Ltd. is United's venture in the **capital market services** and provides its investors a **high-tech environment** to spend their day during market hours and trade in shares within the coveted secondary market. United Securities is also the **investment arm of the Group** in the capital market sector as it ensures that the Groups' earnings from its various concerns are channeled into this market.
